Does your program prepare teachers to:

- integrate technology effectively into curricula and instruction

Yes

- use technology effectively to collect data to improve teaching and learning

Yes

- use technology effectively to manage data to improve teaching and learning

Yes

- use technology effectively to analyze data to improve teaching and learning

Yes

Provide a description of the evidence that your program uses to show that it prepares teachers to integrate technology effectively into curricula and instruction, and to use technology effectively to collect, manage, and analyze data in order to improve teaching and learning for the purpose of increasing student academic achievement. Include a description of the evidence your program uses to show that it prepares teachers to use the principles of universal design for learning, as applicable. Include planning activities and a timeline if any of the four elements listed above are not currently in place.

Candidates complete an instructional technology course in which they develop technology competencies appropriate for use when implementing data-driven instruction. Application of those tools has been integrated into all methods courses in which candidates practice collecting, using, and analyzing data in order to plan instruction. During a course which prepares candidates to teach in inclusive settings, candidates are introduced to the principles of universal design. Competency in application of those principles is developed during methods courses as candidates learn to plan and implement student-centered instruction. During student teaching candidates work with a mentor teacher to implement data driven instruction and the principles of universal design for learning.

Special education teachers are trained and prepared to effectively teach students of all disabilities as defined by IDEA-including the roles of both regular education teachers and special education teachers on the IEP team.

Teachers are trained to effectively assess and participate as a meaningful member of multi-disciplinary team.

All coursework exposes students to the Response to Intervention model. Exposure and understanding of strategies for learners in the classroom include full access to curriculum. Additionally, 4-credit hours of preparation for teaching students who are limited English proficient is required.
