About the Artist

Warren Angle

Working with such textured materials as soapstone, cast aluminum, reclaimed metal, and found objects, Angle dissects nature, removing layers of strata, exposing objects that take form—the physical birth of ideas. I also want to thank the Painted Bride for allowing this show to happen. The Painted Bride has been for us a crucial source of support, making it possible for us to cultivate nature, to create order from randomness; and, the trophy heads stand out framed by rakes and a saw. The antique tools are reminders of man’s obsessive need to control and conquer.
