How to configure Windows 7 to connect to Albright wireless

1. Click on the wireless icon in the lower right system tray.

2. Select Albright from the list of available networks, ensure Connect automatically is checked and then click Connect.

3. The following Network Authentication window will appear. Please enter your LionLink username and password and click OK to continue.
4. Click Connect at the following Windows Security Alert window to proceed with the connection.

5. Select Public Network from the Set Network Location window.

6. You should now be connected to Albright’s wireless.
